

GRAPHING PROJECT

In this project you will:

1. Create 4 different types of graphical displays using information that you choose. You will have 4 different types of graphs in your project when you have successfully completed your work. You must use some technology to create and display your graphs.
2. Each display must include the table of data, reference telling where you found that data, and an appropriate graph.
3. Along with each graph, you need to write a short paragraph explaining your information and what the graph says. Your explanation must be created you a text program.
4. You may print your information and create a tabletop display or you may create a power point presentation or use another presentation program to present your project.

RUBRIC:

4 – Followed all directions; project shows definite understanding of appropriate graphical displays; information is presented without grammatical, spelling, or punctuation errors; information is clearly organized and easily understood; project is turned in by the due date.

3 – Followed all directions; project shows definite understanding of appropriate graphical displays; information is presented with few grammatical, spelling or punctuation errors; information needs to be more clearly organized for understanding; project is turned in by the due date.

2 – Followed most of the directions; project displays at least 3 appropriate graphical displays; information may have some grammatical, spelling, or punctuation errors; organization may need improvement; project is late.
